

**B**abelNet **AN**notation **G**roup

## Why do we need annotations?

- You want your language to be covered as much as possible
    - I am myself working on Italian verbs and adjectives
  - You might want to have fun with finding **good pictures for difficult (abstract?) concepts** (promote; acquire; ontological, etc.)
- 

## BabelNet ANnotation Group (BANG)

- Each BabelNet user (registered on the website) can **access blocks of synsets** to be annotated in the user's native language
- It is an interesting **collaborative experiment** that has no precedent because of the kind of annotation (Wiktionary is very different)
- The data will be **made available openly-available with a CCo free license**

The diagram illustrates the flow of information from a user-defined 'Native Language' to the corresponding fields in the annotation form. Three red arrows originate from the 'Native Language' text box and point to the 'New Italian definition', 'New Italian lemmas', and 'New Italian examples' input fields, indicating that the user's input is intended to populate these fields.

## What comes next?

- **BabelNet live**
  - It will be updated every week or day
- **Babelscape**, a **Sapienza startup company** that will start in late March
  - Continuously improving BabelNet
  - Licensing BabelNet and Babelfy
  - Building services on top of them
